invites you to Lebanon.

Lebanon's cultural code has been shaped for thousands of years. Just as the trunks of the Lebanese cedars slowly the trunks of Lebanese cedars gain their volume, the pattern of local traditions was created. Into this pattern have been woven their ideas of the world by the ancient Phoenicians, the Arameans, the Greeks, the Romans, the Persians, the Arabs, and the French. Here, deeds for the glory of the gods and the growing power... of empires. This is where the cradle of civilization the cradle of civilization, Byblos, the oldest city on earth the oldest continuously inhabited city on earth. It was here, on the shores of the Mediterranean Sea, Phoenician traders invented the world's first alphabet. Of the cedar that grew in this land, Noah is said to have built the ark.

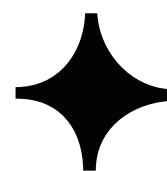

The Lebanese of this century have something to add to this motley fabric of history. Beirut is one of one of the most dynamic capitals of the Middle East. Here we will have an unforgettable aesthetic and gastronomic experience - the designer hotel and the progressive designer hotel and progressive, vistas restaurants.

We will listen to the whispers of time, solve riddles of history and enjoy the achievements of modern civilization. We'll breathe in the cool mountain air, filled with the with the scents of cedar, break a freshly baked flatbread, learn how to make spicy snacks, and look at the seashore from under the stars.

Baalbek

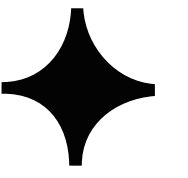

On the stone altars of Baalbek from the earliest times the sun god Baal was worshipped hence the name, and with the rise of the Roman Empire there were giant temples to Jupiter, Bacchus and Venus. Baalbek is famous for them all over the world, and travelers have come to see them. Old World travelers from the middle of the XIX century, wrote about them Flaubert, Bunin, Mark Twain.

The columns of Jupiter's temple are stunning with their scale, three times the height of the Parthenon columns the height of the columns of the Parthenon on the Greek Acropolis.

The mystery of the centuries remains to this day the trilithons, the giant monolithic slabs laid in the base of the temple. How did it ancient people have been able to do?
